Closed Circuit Portable Impactor Plant

This plant is designed for larger-size jobs that require cubicle spec products from a highly portable crushing and screening plant on one chassis.

Features

1. Available in tri-axle or quad-axle version. Each features one-pull transport with optional rear tag axle. Check with your DOT.
2. Two-deck inclined screen produces two cubical spec products. Plant is also available with a twin-shaft screen option with third reliever deck.
3. Top-deck retained material is returned to the crusher for further processing.
4. Hydraulic lift and leveling system enables quick set up and tear down by using the hydraulic run-on legs.
5. Totally self-contained, reliable diesel/electric or all-electric power. You won’t have to worry about hydraulic leaks and failures shutting you down.
7. Features the industry’s only LIFETIME ROTOR WARRANTY on its solid-steel, three-bar, sculptured rotor—the industry’s heaviest—to keep you up and crushing.*

Additional Features

- Features closed-circuit crushing and screening on one chassis.
- Replaces Jaw/Cone/Screen multi-unit systems for a much lower initial investment while maintaining a high production of cubical spec product. Greatly reduces maintenance and fuel costs and is easily transported.
- Features unique two-step, 5’ grizzly deck to remove fines before crushing.
- Features standard grizzly bypass chute and available cross-belt conveyor with flop gate to allow for either removal of the material that passes through the grizzly deck for stockpiling or blending back with the crushed material.
- Includes removable electrical control panel featuring pre-wired receptacles for radial stackers.
- Transports easily with the hydraulic retractable return conveyor and folding side conveyor.
- Manage the feeder speed for complete control of the flow of material into the impactor with Variable Frequency Drive (VFD).
- Includes wireless remote control for the feeder shutdown and all motor stop.

* North America only.
