

TALONSTACK™

The new TalonStack™ self-propelled stockpiling conveyor has been designed to improve productivity and mobility while minimizing operator costs.

PRIMARY FEATURES

- » The TalonStack track conveyor line is available in four sizes to meet operator's needs, big or small.
- » The stackers all have variable belt speed, feed height, and discharge height, allowing for complete control over how material is stockpiled.
- » The TalonStack line is available with a dual-power option that can connect to the TalonTrax, or any other dual-power crushing or screening plant, ensuring operators can focus on production, not on constant stockpile maintenance.
